

Member Spotlight  
August 27, 2015

Lisa Percy with All Elements Mechanical is the type of member that every volunteer organization hopes for. She is dedicated to "the mission," personally believes strongly in the value of the organization's efforts, and actively participates in recruitment and on committees.

To date, she has recruited five high-rise projects totaling 678,000 square feet into the FGBC certification programs, and she chairs the FGBC Green High-Rise Committee.

"I love sustainability because I love my kids! I want to be a part of their future in every way possible... so I decided to BUILD a better one for them through education and sustainability," says Lisa, who is the Director of Education & Sustainability for All Elements Mechanical.

Fittingly, Lisa is actively involved in the Orange County Public Schools Green School program that encourages taking a holistic approach to going green by incorporating school ground enhancement, resource conservation, curriculum connections, and community involvement with a school-wide commitment and focus on sustainability.

In her personal life, Lisa spends much of her time outdoors.

"I love kayaking the Wekiva River, having a full day at the beach, and spending time with family. When I can, I visit our family cabin in North Carolina and disconnect for a while. I love to run and have run one actual marathon. But with two adorable boys, I basically run marathons every day, Lisa adds.

*About All Elements Mechanical Corp.*

[All Elements](#) was founded under the principle of providing energy conservation solutions, green building practices and sustainable action through the education of our community. We focus primarily on energy efficiency and the Elements that constitute a healthy, safe and quality environment for future generations which incorporate HVAC, Water, Energy and Green practices. The future of our society depends upon educating and implementing sustainable solutions and we pride ourselves on the ability to make a difference by embracing All Elements in our business model.

We believe that we can make a difference. The team at All Elements is committed to providing homeowners and businesses with energy saving and sustainable solutions. We are guided by the belief that education will lead to a community that is determined to leave our children a better world.

*Lisa's son Jude and his future inspire everyone at All Elements Mechanical*
